Catégorisation des revues en Économie et en Gestion

Version 2.1, juin 2008

Objectifs et principes

Introduction

La section 37 du Comité National de la Recherche Scientifique présente dans le document qui suit sa liste mise à jour en juin 2008 des revues à comité de lecture dans le champ de l'économie et de la gestion (version 2.1). Cette liste distingue par domaine scientifique quatre catégories de revues ; ces catégories sont ordonnées. Une première version de cette liste avait été publiée en juillet 2004 (version 1.0). Une seconde version largement restructurée, étendue à quelques 600 revues, a été publiée en octobre 2007 (version 2.0). La présente édition n'introduit que peu de modifications et précise les conditions des mises à jour régulières de la liste.

Objectifs et *caveat*

La liste proposée est conçue comme un outil d'aide à la décision et non pas comme un moyen de classement aveugle et automatique, qui se substituerait, *eo ipseo*, à une instance d'évaluation et de jugement scientifique.

La liste doit essentiellement pouvoir servir aux évaluateurs à mieux repérer les revues reconnues ou considérées comme de référence dans un domaine disciplinaire donné. Elle doit également être utile aux équipes et à leurs chercheurs, notamment les plus jeunes, en fournissant des repères pour définir une stratégie de publication et identifier les supports les plus importants ou accessibles pour diffuser des résultats de recherche.

Dans un contexte où la bibliométrie gagne du terrain dans les instances nationales et internationales d'évaluation et de programmation de la recherche, il est apparu essentiel que le Comité National dispose d'un outil de catégorisation raisonnée des revues pour éviter que la communauté des économistes et des gestionnaires ne se fasse imposer de l'extérieur un classement moins soucieux de représenter les divers domaines de l'économie et de la gestion et plus soumis à des jugements normatifs.

La liste précédente a été utilisée bien au-delà du cadre de la section 37 du Comité National de la Recherche Scientifique. Il nous semble donc important d'insister sur quelques limites du travail proposé ici. Les divers domaines couverts par cette liste présentent des spécificités qu'il serait imprudent d'ignorer. Au sein d'une même revue, la qualité des articles publiés peut évidemment varier de façon significative. Le mode de fonctionnement des revues ainsi que leur réseau évolue dans le temps ; l'émergence des revues électroniques contribue à ces évolutions. Les disciplines connexes à l'économie et à la gestion ne sont pas couvertes par la présente liste. Un travail d'évaluation sérieux se doit de prendre en compte cette complexité et éviter une utilisation trop réductrice de la liste proposée.

Une répartition en domaines qui s'efforce de respecter les différentes composantes de l'économie et la gestion

La liste est présentée par grands domaines de l'économie et de la gestion. Le souci de fournir des repères facilement appropriables dans l'ensemble des champs de l'économie et de la gestion a en effet conduit à organiser la liste par grands champs disciplinaires. Outre les « revues généralistes », 20 domaines spécialisés ont été définis qui correspondent à autant de communautés effectivement identifiées dans la recherche française en économie et gestion (soit 5

domaines de plus que dans la liste précédente pour pallier des manques, essentiellement en gestion, ou pour limiter l'hétérogénéité de certains domaines).

Il est important de souligner que chaque domaine est structuré de manière spécifique. Il faut donc rester prudent dans l'interprétation de la position relative dans la catégorisation proposée de deux revues appartenant à des domaines différents. C'est tout particulièrement vrai du rapprochement entre revues généralistes et revues de domaines qui ne peut être fait qu'avec énormément de précautions.

On présente ci-après la liste des domaines retenus. Pour chacun d'entre eux, on donne son intitulé en français et en anglais. Dans la présentation de la liste, chaque domaine est repéré par un code comportant un petit nombre de lettres.

| Travail | Economie du travail | Labor Economics |

Une élaboration concertée

Nous avons élaboré la présente liste en étant conscients des limites inhérentes à une telle démarche : risque de primer la notoriété au détriment de la qualité effective des revues, renforcement des effets de réseau, prépondérance des revues américaines, distorsion entre les différentes sous-disciplines de l'économie et la gestion, etc. Pour éviter que de telles limites ne

disqualifient d'emblée ce travail, notre démarche s'est appuyée sur une large concertation avec la communauté des économistes et des gestionnaires.

L'ensemble des laboratoires de recherche relevant de la section 37 a été invité à contribuer à cette révision. Pour chaque domaine on s'est également appuyé sur la société savante française correspondante, lorsqu'elle existait. Faute de société savante identifiée, il a été demandé à différents experts du champ d'aider la section dans son travail de catégorisation. Enfin, de très nombreuses contributions individuelles ont été reçues. Les listes établies par des organismes français ou étrangers ainsi que les informations fournies par les organismes de référence (SSCI, SCI ou EconLit par exemple) ont, bien sûr, été consultées.

Notre démarche reposant à la fois sur l'expertise et une concertation large a pour objectif que la communauté des chercheurs et enseignants chercheurs en économie et en gestion se saisisse du résultat obtenu tout en reconnaissant les limites.

Principes et limites

Le processus d'élaboration de cette liste nous a conduit à prendre plusieurs partis.

- La liste concerne exclusivement des *revues académiques à comité de lecture*. Cela signifie que toutes les revues mentionnées font, en principe, l'objet d'un processus d'évaluation par plusieurs arbitres, donnant lieu à des rapports écrits. Dans presque tous les cas, le comité de rédaction des revues incluses dans la liste est ouvert à des collègues étrangers. Leur diffusion dépasse, en général, le seul cadre français.

Certaines revues de grande qualité mais servant principalement de vecteur de valorisation de la recherche auprès du monde professionnel et/ou ne recourant pas systématiquement à une sélection des articles utilisant un processus académique classique ne figurent donc pas dans cette liste.

- La liste n'est *pas exhaustive*. La section est parfaitement consciente que des revues importantes et de bonne qualité ne figurent pas dans la liste.

Nous n'avons retenu que des revues effectivement mentionnées par les experts ou communautés sollicités.

On a également écarté de cette liste les revues n'appartenant pas clairement au cœur de la discipline de l'économie et de la gestion, revues pour lesquelles la section 37 a peu ou pas de légitimité pour émettre un jugement. Ce dernier principe a toutefois été appliqué avec discernement. En particulier, la liste est ouverte à des revues ne relevant pas exclusivement du champ de l'économie et de la gestion mais dont les objectifs précisent que des articles relevant de ces disciplines entrent dans leur champ.

Soulignons qu'il est parfaitement légitime pour un chercheur ou un enseignant-chercheur en économie ou en gestion de publier dans des supports ne figurant pas dans la présente liste, en particulier lorsque la recherche a une forte composante pluridisciplinaire. Il importera alors au chercheur ou à l'enseignant-chercheur de justifier et d'argumenter son choix de support.

- La liste ne tient compte que des *revues en langue française ou anglaise*. Les revues en d'autres langues ont été délibérément écartées : la section a estimé ne pas disposer des compétences nécessaires pour procéder à l'évaluation de telles revues.
- Seules ont été conservées les *revues « vivantes »* et *« installées »*. La liste ne comporte que des revues faisant l'objet d'une publication régulière ; elle ignore délibérément les titres qui n'existent plus (à des fins d'évaluation rétrospective, il importera donc de ne pas ignorer les versions précédentes de cette liste). Nous avons également choisi de ne pas inclure les revues *« émergentes »* de création trop récente, quel que soit le niveau des premiers articles publiés ou leur notoriété. Dans le contexte actuel de foisonnement de revues, il nous a semblé plus raisonnable d'attendre qu'une revue *« s'installe »* et conforte effectivement sa qualité avant de l'intégrer dans notre liste. Un tel critère ne s'applique

cependant pas lorsqu'une revue de création récente vise à en remplacer une autre plus ancienne.

- La liste prend partiellement en compte le principe de « l'exception française ». L'ignorance de la langue française conduit les classements internationaux à prendre peu en compte les revues publiant des articles en français. Notre travail tente de corriger, au moins en partie, ce biais en étant plus exhaustif dans la couverture de ces revues.

Une catégorisation en quatre niveaux

Au sein de chaque domaine, les revues ont été réparties en 4 catégories ordonnées, en essayant de tenir compte de plusieurs critères : notoriété scientifique, audience, impact. Comme les lecteurs le constateront, la présente mise à jour abandonne la définition des catégories en « nombre d'étoiles ». Cette définition se prêtait en effet à des manipulations arithmético-statistiques dont la signification et la pertinence était fortement sujette à caution et que nous ne souhaitons pas encourager. Les revues sont affectées à une catégorie allant de 1 à 4 par ordre de qualité décroissant. Par souci de cohérence avec l'ancienne version de cette liste, on a distingué, pour les seules revues généralistes, une cinquième catégorie (appelée 1*) rassemblant les revues de la catégorie 1 qui apparaissent particulièrement remarquables.

Dans l'interprétation de la liste, il importe de garder à l'esprit qu'au sein de chacune des quatre catégories ordonnées que nous avons distinguées il subsiste une certaine variabilité en terme de qualité. C'est pourquoi nous employons le mot « catégorisation » plutôt que « classement ».

Une évaluation dynamique

Ce travail a clairement vocation à être discuté et amendé régulièrement, qu'il s'agisse d'introduire de nouvelles revues après leur période probatoire ou d'effectuer certains reclassements pour tenir compte de la vie des revues ou d'une meilleure appréciation de leurs mérites. Ces révisions peuvent s'effectuer annuellement sur la base des informations reçues par la section 37, tant des comités éditoriaux sur les modalités de fonctionnement de la revue que des communautés scientifiques et associations savantes faisant état des qualités de la revue dans l'animation de leurs domaines scientifiques. La section 37 pourra aussi lancer un chantier de révision de plus long terme pour traiter par exemple de la situation des revues de langue française ou introduire des publications dans d'autres langues. A cet égard, les remarques et suggestions suscitées par la version précédente de cette liste ont été et seront conservées.

Guide de lecture

La liste est présentée de deux manières différentes.

On donne (pages 1 à 22) tout d'abord la liste des revues par domaines (les domaines spécialisés sont classés selon l'ordre alphabétique de leur code). Chaque revue est repérée par son nom, son numéro ISSN, le code du domaine et le numéro de la catégorie à laquelle elle appartient (de 1 à 4 avec, pour les revues généralistes, l'adjonction d'une catégorie 1*).

On donne ensuite (pages 23 à 35) une liste alphabétique de l'ensemble des revues figurant dans la liste. Notons enfin que certaines revues apparaissent délibérément dans deux domaines différents. Elles figurent alors deux fois dans la liste alphabétique.

Remerciements

En conclusion, la section 37 du comité national tient à remercier l'ensemble des collègues qui ont été sollicités et ont accepté de consacrer du temps à ce projet.

Pascal Petit

Président de la section 37
